

I'm glad to see that this board is seeking funds for those students who will need tutoring services because of the new Algebra placement policy. We certainly want to see our students be successful.

I noticed that the source for this \$340,000 in funding will be the state's DSSF- Disadvantaged Students Supplemental Fund. Wait a minute-didn't board chair Mr. Margiotta sign a statement in order to get that funding? DSSF funding requires that Local Education Agencies must sign a statement that their policies will not contribute to resegregation of the schools. Will we be able to keep this funding or will it go the way of our federal magnet funding under this board majority's tenure?
