

Since WCPSS is expecting another budget cut next year, how can we afford the new assignment plan, special schools and programs? How much are these going to cost? Where is the money coming from? What programs are losing funding to pay for the single sex Leadership Academies? What programs are losing funding for the additional busses and admiration costs required for the new assignment plan? The new STEM programs start up money came from bond money (why was the left over bond money not spent on buildings? When I voted on the bond money we were told the bond was for buildings not special programs) where will the money come from to continue these programs? How are you going to continue to pay for Walnut Creek?

Have you have spent money we do not have?
