**THE CCCAAC Comments on Proposed Changes to Job Description for Superintendent**

The recent proposed changes to the Job Description for Superintendent supported by WCPSS BOE majority continue to show their efforts to promote racial and economic divide among our community and students. Separating students according to race and economic divide does not provide quality education for all children but rather support segregation.

The BOE majority continues to make decision regarding the education of our children without having knowledge/understanding the need for quality education for all children.

**Does the BOE understand?**

\*Business leaders work to garner yearly profit versus an educator who works for dividends that occur at the end of the education cycle; graduation from high school

\*The Business community interest is only for financial profit versus an educator who is concerned about educating all children and has been trained in the profession of education

\* A business can control their clientele versus an educator who teaches public education which is designed for the public

1. Would the BOE majority seek a doctor/surgeon for medical care who has not been trained in the medical profession when you are ill and in desperate need of urgent health care?
2. Would the BOE majority seek an attorney who has no legal training when you are on death row?
3. Would the BOE majority seek a dentist without proper training when needed to be properly fitted for dentures?
4. Would the BOE majority seek legal services from a business person who has no legal knowledge or legal experience?
5. Would the BOE majority seek a leader for our school system, someone who has no educational background or knowledge to lead our school system?

**The fight is for ALL CHILDREN!!**

**It's all about the children!!!**
